

## Supply Chain Success Story!

# Logistics Plus Manages Complex, Dangerous Project Delivering 22-thousand Tons of Gas Pipes to Ukraine

## THE STORY

When the war began in Ukraine, Logistics Plus delivered millions of dollars of aid and support ... and managed a complex delivery of twenty-two thousand tons of gas pipes for Vorex LLC, a global oil and gas supply company, to Ukraine, including the first non-grain ocean vessel to one of its key ports.

## THE HIGHLIGHTS

- Circa 2023. Logistics Plus managed a complex, sometimes dangerous logistics project for Erie, PA-based [Vorex, LLC](#), an American oil and gas producer.
- The entire project involved the delivery of \$100 million worth of gas pipes totaling 22-thousand tons using four chartered ships.
- The final shipload of casing and drilling pipe was delivered directly to the Ukrainian port of Chornomorsk, the first non-grain vessel delivered since the war began.
- After the ships were offloaded, sometimes amidst nearby missile attacks, 1,000 trucks were used to avoid anti-ship mines in the Black Sea to deliver the pipes to their final destinations across Ukraine.
- The entire project was successfully executed with no human injuries.

*Creative Solutions for Unique Challenges.*
