

Supply Chain Success Story!

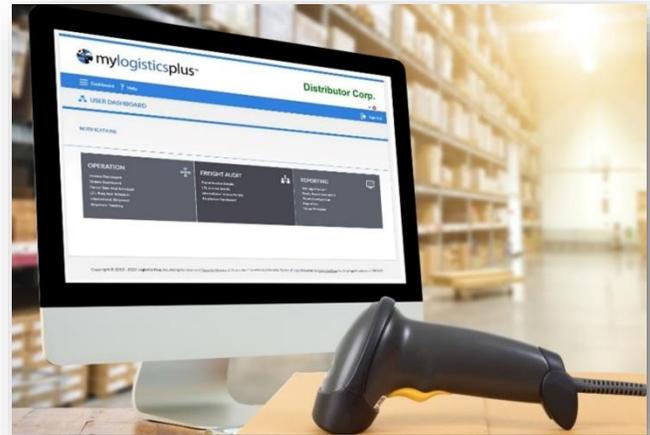

Customized Multi-Modal TMS for a Global Industrial Distribution Firm

THE STORY

When a global industrial distribution firm needed a multi-modal transportation management system (TMS) to support its six warehouses and provide full supply chain visibility and reporting, they called Logistics Plus.

THE HIGHLIGHTS

- Logistics Plus implemented its MyLogisticsPlus™ cloud-based TMS with a direct interface to the client's warehouse management system (WMS).
- The MyLogisticsPlus™ portal was customized for parcel, freight, and international order and shipping processing, backed with freight audit and payment services, real-time visibility tracking, and business intelligence reporting.
- Logistics Plus created an operational routing center to help the client's vendors cost-effectively route shipments moving inbound from its facilities.
- Logistics Plus implemented its FAS (freight audit solutions) process to facilitate contract and rate management, file carrier disputes, and provide critical business intelligence across all modes of the client's supply chain.
- With less diversion of resources on transportation and logistics, the client continues to enjoy record year-over-year sales and profit results.

Creative Solutions for Unique Challenges.
Global Logistics + So Much More!
